EXAMINERS AMENDMENT

1. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to the applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this amendment was given in a telephone interview with Fred Zollinger on March 9, 2010.
 - a. The claims have been amended as follows:
 - i. Claim 21, line 11, the words "the arc length from the arc length of the mean pitch size" are replaced with --arc length from arc length of mean pitch size --.

Allowable Subject Matter

3. Claims 21 - 22, 25 - 28 are allowable over the prior art of record.
4. The following is a statement of reasons for the indication of allowable subject matter:
5. While Sekula (U.S. Patent Number 4442499) teaches defining an amplitude for each of the selected modulation orders; defining a phase for each selected modulation order; creating a function for each modulation order that includes the defined amplitude and phase of the modulation order; summing the created functions for each modulation order to create a wave Y having a curve; solving the equation to obtain a unique set of pitch sizes; arranging tread lugs on a tire tread of a pneumatic tire to match the tire noise pitch sequence; and Kogure (U.S. Patent Number 5383506) teaches selecting three, four, five, six or seven modulation orders;

and Stuckey (U.S. Patent Application Publication 2003/0040886) teaches defining a lug stiffness variation curve (Di) to be the accumulation of the deviation of the arc length from the arc length of the mean pitch size; none of these references taken either alone or in combination with the prior art of record teaches a method of forming a tire tread having a tire noise pitch sequence for a pneumatic tire, specifically including:

- a. Regarding claim 21, **“setting the lug stiffness variation curve equal to the curve of the Y wave to define an equation”**, in combination with the remaining features and elements of the claimed invention.

6. It is for these reasons that the claims distinguish over the prior art of record.
7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
